Alloys International, Inc.

Since 1969 Alloys International has set itself apart as a Specialty Metals and Forgings company with a difference.

I am exceptionally good at what I do, and I pride myself on supplying not just metal, but creative solutions to your problems - along with superior service.

If you give me the opportunity to work with you I will earn your business, this is my promise to you!

Below are the grades we carry and convert to size. Our core strengths are in Titanium, Nickel and Specialty grades of Steel but we also excel at hard alloy Aluminum in tubing, extrusions, forgings and flat rolled products.
